- Oulu, Finland
- Right to work in Finland
- Available immediately
- Open to relocation

SUMMARY

Full-stack engineer with 10+ years building production systems end to end. Four and a half years on Aviadex, an aviation data-exchange platform used by 40+ airlines and Rolls-Royce: Angular/TypeScript frontend, C#/.NET APIs and Azure services, PostgreSQL data models, and integrations with external systems that were not under our control. Comfortable owning a feature from data model to production support.

EXPERIENCE

Full Stack Engineer · QOCO Systems

Jan 2022 – Jun 2026

Espoo, Finland / remote

- Owned features end to end on Aviadex, a data-exchange platform for aviation maintenance: Angular frontend, .NET APIs, data model, deployment and production support.
- Built the daily reconciliation that compares SDC/CSN life values between airline datasets and Rolls-Royce's engine-lifing system and exports discrepancies; a wrong number decides when an engine part is retired.
- Designed C#/.NET REST APIs and Azure Functions for ingestion, validation, normalization and persistence, with idempotent Service Bus consumers and PostgreSQL/EF Core behind them.
- Replaced a monthly KPI report that one person ran by hand with live dashboards and Application Insights alerting, used daily by a 12-person support team.
- Implemented OAuth2/OIDC authentication with Entra ID and role-based authorization; used App Insights for tracing, alerting and production root-cause work.

Stack: C#, .NET, Azure Functions, Service Bus, PostgreSQL, EF Core, Flyway, Angular, TypeScript, RxJS, Application Insights

Software Architect · Xiamen Airlines

Jul 2015 – Jun 2019

Xiamen, China

- Set architecture, coding standards and technical direction for mission-critical aircraft-maintenance software; led and mentored frontend and backend engineers.
- Built a Vue.js + WeUI mobile web app that gave field engineers maintenance access away from a desk.
- Owned production incidents on a 24/7 on-call rotation and verified data synchronisation for multi-region active-passive disaster recovery.

Stack: Java, Vue.js, SQL Server, high availability, disaster recovery

Engineering Manager / Lead Developer · Moshi E-Commerce

Jul 2014 – Jun 2015

Xiamen, China

- Led a distributed team building e-commerce systems end to end: architecture, APIs, data models and delivery.
- Kept a written review and documentation standard applied as the team grew.

Software Engineer · Shenzhen Comtop Technology

Jul 2011 – Jun 2014

Shenzhen, China

- Built Java EE applications for China Southern Power Grid, mainly distribution-network cost estimation software.

SELECTED PROJECTS

shsf · Claude Code plugin
A spec-first workflow published as an installable plugin. The spec file is the interface: decisions are written down, and the agent executes against them instead of rediscovering the repository.

azure-functions-servicebus-iac · Terraform reference
Infrastructure for Azure Functions and Service Bus as reviewable code rather than portal configuration.

deep-demo · multi-agent verification
Generates a React prototype, writes Playwright end-to-end tests against its own output, runs them and iterates on failure.

zodcat · developer tool
Browser-only workbench for defining json-render catalogs with live Zod schema guardrails and TypeScript export.

SKILLS

BACKEND	C#, .NET, ASP.NET Core, REST API design, Azure Functions, Service Bus, EF Core, PostgreSQL, SQL Server, Flyway
FRONTEND	Angular, TypeScript, RxJS, Vue.js, HTML/CSS, accessibility, performance
CLOUD & DELIVERY	Azure, Application Insights, CI/CD, Docker, Terraform (reference project), Git
AI-ASSISTED	Claude Code daily, plan-first review, multi-agent testing, evaluation of generated code
TESTING	Playwright, unit and integration testing, code review, production troubleshooting

EDUCATION

M.Sc. Information Processing Science — 2019 – 2021
University of Oulu, Finland

B.Eng. Computer Software Engineering — 2007 – 2011
Harbin Institute of Technology, China

LANGUAGES

English · professional working proficiency
Chinese (Mandarin) · native
Finnish · basic (A1)
